### **Exploration updates**

#### **Golden Sky Project**

The Golden Sky Project is located within the Mishibishu Lake Greenstone Belt of Northern Ontario, an extension of the Abitibi Greenstone Belt, and host to the high-grade Eagle River Mine of Wesdome Gold Mines Ltd ("Wesdome"). The Golden Sky Project is located approximately 50 kilometres west of the town of Wawa and is situated immediately between the Eagle River underground mine and the Mishi open pit mine of Wesdome.

Exploration is currently underway on the Golden Sky project with both ground geophysical and geochemical programs completed. The surveys covered two of the project's most advanced targets, the Dorset Gold zone and the Banded Iron Formation ("BIF") gold zone, with both targeting high-grade gold mineralization in close proximity to the Eagle River Mine Complex of Wesdome Gold Mines Ltd. The work identified gold targets for the on-going drilling program which began early July.

The Property is royalty-free. No resources or reserves exist on the Property.

No activity to report on this property.

### **Trends and Economic Conditions**

Management regularly monitors economic conditions and estimates their impact on the Company's operations and incorporates these estimates in both short-term operating and longer-term strategic decisions.

Due to the worldwide COVID-19 pandemic, material uncertainties may arise that could influence management's going concern assumption. Management cannot accurately predict the future impact COVID-19 may have on:

- Global precious or base metal prices;
- Demand for precious or base metal and the ability to explore for precious or base metal;
- The severity and the length of potential measures taken by governments to manage the spread of the virus, and their effect on labour availability and supply channels;
- Availability of government supplies, such as water and electricity;
- Purchasing power of the Canadian dollar; and
- Ability to obtain funding.

At the date of this Interim MD&A, the Canadian federal government and the provincial government of Ontario have not introduced measures that have directly impeded the operational activities of the Company. Although cash in the Company has declined, management believes the business will continue and, accordingly, the current situation has not impacted management's going concern assumption. However, it is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company in future periods.

### **Outlook**

The Company intends to continue exploring properties that have the potential to contain precious and base metals. In addition, management will review project submissions, and conduct independent research, for projects in such jurisdictions and commodities as it may consider prospective.

This compares with a net loss of \$690,068 with basic and diluted loss per share of \$0.03 for the three months ended July 31, 2020. The Company had no revenue in both periods presented. The increase in net loss was principally due to:

- Professional fees decreased in the three months ended July 31, 2021, to \$34,351 compared with \$42,046 for the same period in 2020, primarily due to lower corporate activity requiring external professional support services.
- Share-based payments increased in the three months ended July 31, 2021, to \$90,931 compared with \$nil for the same period in 2020. - All other expenses related to general working capital purposes.

- Professional fees decreased in the six months ended July 31, 2021, to \$43,280 compared with \$65,282 for the same period in 2020, primarily due to lower corporate activity requiring external professional support services.

The Company's total assets at July 31, 2021 were \$4,629,470 (January 31, 2021 - \$2,144,545) against total liabilities of \$1,562,853 (January 31, 2021 - \$74,938). The increase in total assets of \$2,484,925 resulted from the financing of \$3,297,000 completed on March 18, 2021, which was offset by cash spent on exploration and evaluation expenditures and operating costs. The Company had sufficient current assets to pay its existing current liabilities of \$1,562,853 at July 31, 2021. Liabilities include flow-through share liability of \$812,000 which is not settled through cash payments. Instead, this balance is amortized against qualifying flow-through expenditures, subject to deadlines imposed by the tax authorities.

Pursuant to the terms of flow-through share agreement, the Company is in the process of complying with its flow-through contractual obligations to subscribers with respect to the Income Tax Act (Canada) requirements for flow-through shares. ### **Liquidity and Capital Resources**

Management believes that the Company's cash and cash equivalents balance of \$4,491,381 at July 31, 2021 is adequate to cover current expenditures and exploration expenses for the coming year.

The Company may, from time to time, when marketing and financing conditions are favourable, proceed with fundraising to fund exploration and property acquisition projects.

The activities of the Company, principally the acquisition and exploration of properties that have the potential to contain precious and base metals, are financed through the completion of equity transactions such as equity offerings and the exercise of stock options. There is no assurance that equity transactions will be available to the Company in the future in the amounts or at the times desired or on terms that are acceptable to the Company, if at all. See "Risks and Uncertainties" below.

Cash and cash equivalents provided by financing activities was \$3,258,556 for the six months ended July 31, 2021. Financing activities were affected by the financing of \$3,297,000, which was offset by share issue costs of \$38,444.

Regardless of whether the Company discovers a significant precious or base metal deposit, its working capital of \$3,050,024 at July 31, 2021 is anticipated to be adequate for it to continue operations for the twelve-month period ending July 31, 2022.
